Computational Geometry – Exercise Meeting #5

February 16th, 2022

What did you think of these meetings?

Would you prefer a different format?

Do you have any ideas for next time?

E-mail us! 😊

Art Gallery Problem – Simple polygons

Simple polygon:

- No intersection of edges
- No holes

Guard and guard cover:

- Represented by points
- Placed on vertices of the polygon
- Cover contains all points that are visible from the guard

Visibility graph – Simple polygons

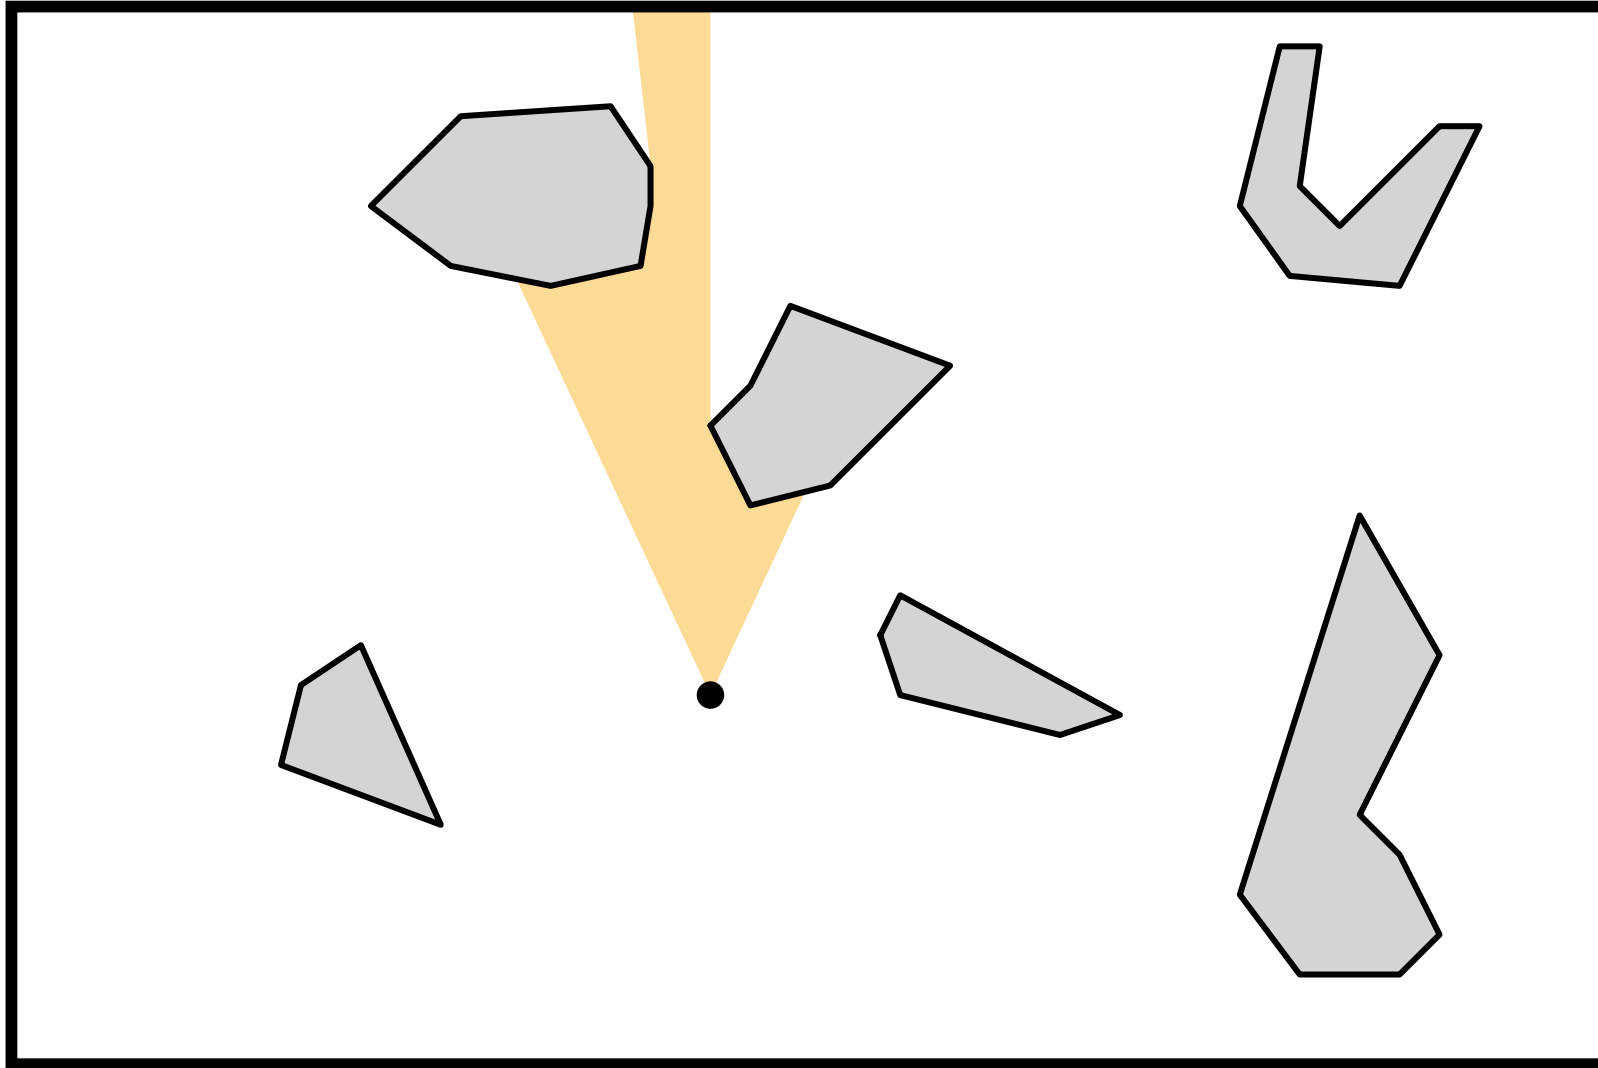

Simple polygon:

- No intersection of edges
- No holes

Guard and guard cover:

- Represented by points
- Placed on vertices of the polygon
- Cover contains all points that are visible from the guard

Motivation – Raytracing

Motivation – Raytracing

Motivation – Raytracing

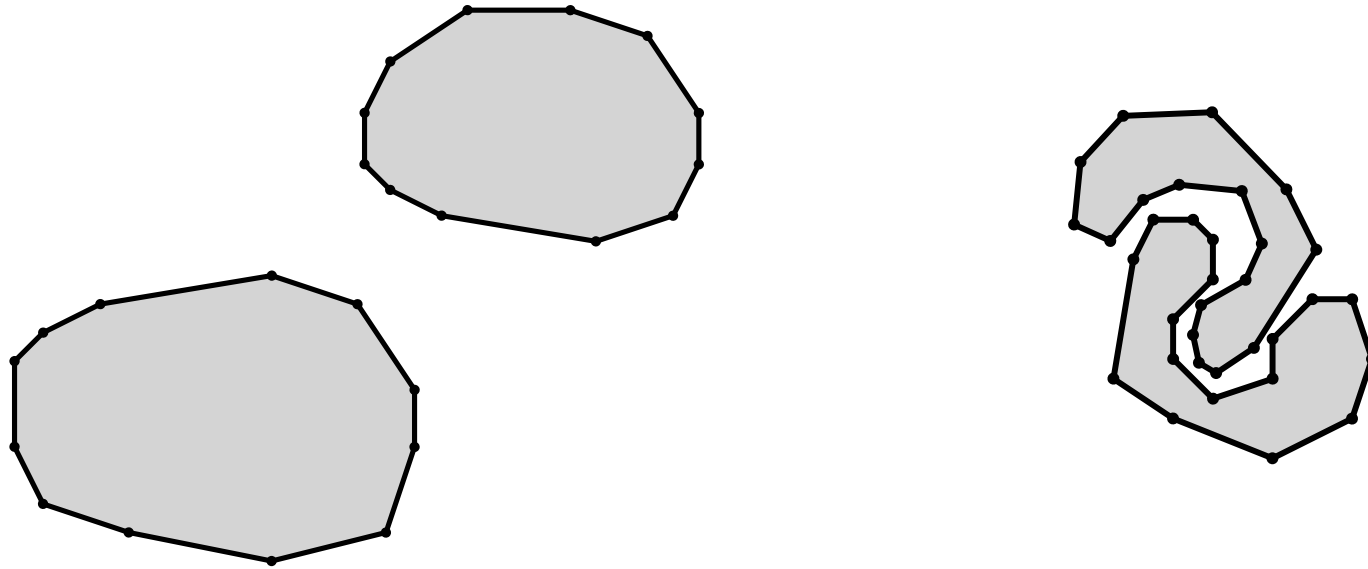

Polygon-Line intersection

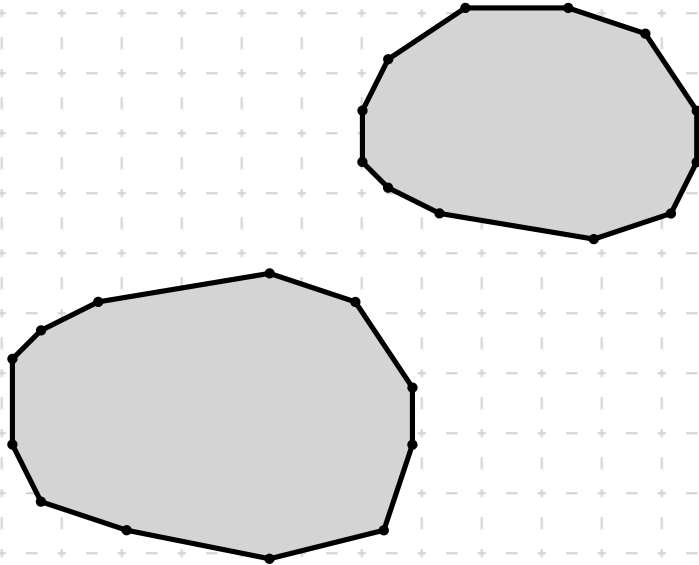

Polygon-Line intersection

Polygon-Polygon intersection

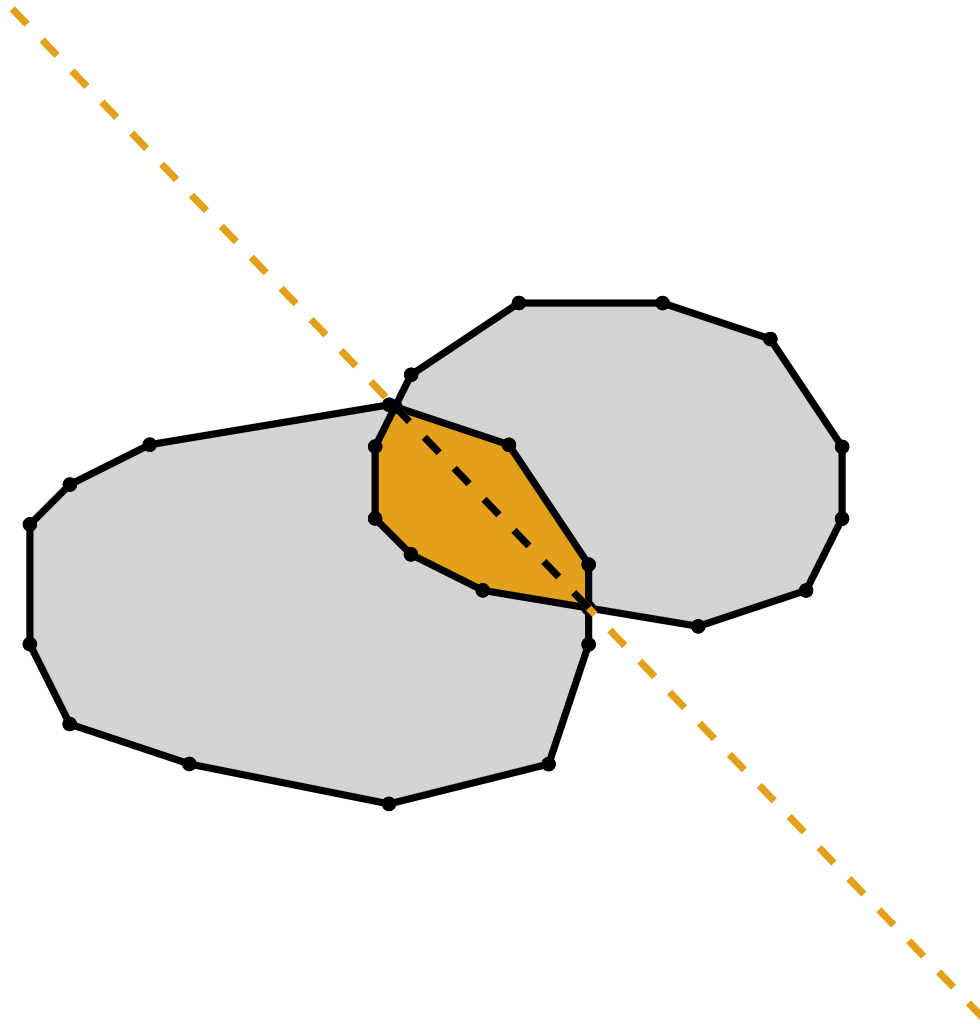

Polygon-Polygon intersection

Convex-Convex intersection

Convex-Convex intersection

Convex-Convex intersection

Bounding volumes

A Bounding volume is the smallest of a given shape/geometric object type that fully encloses another.

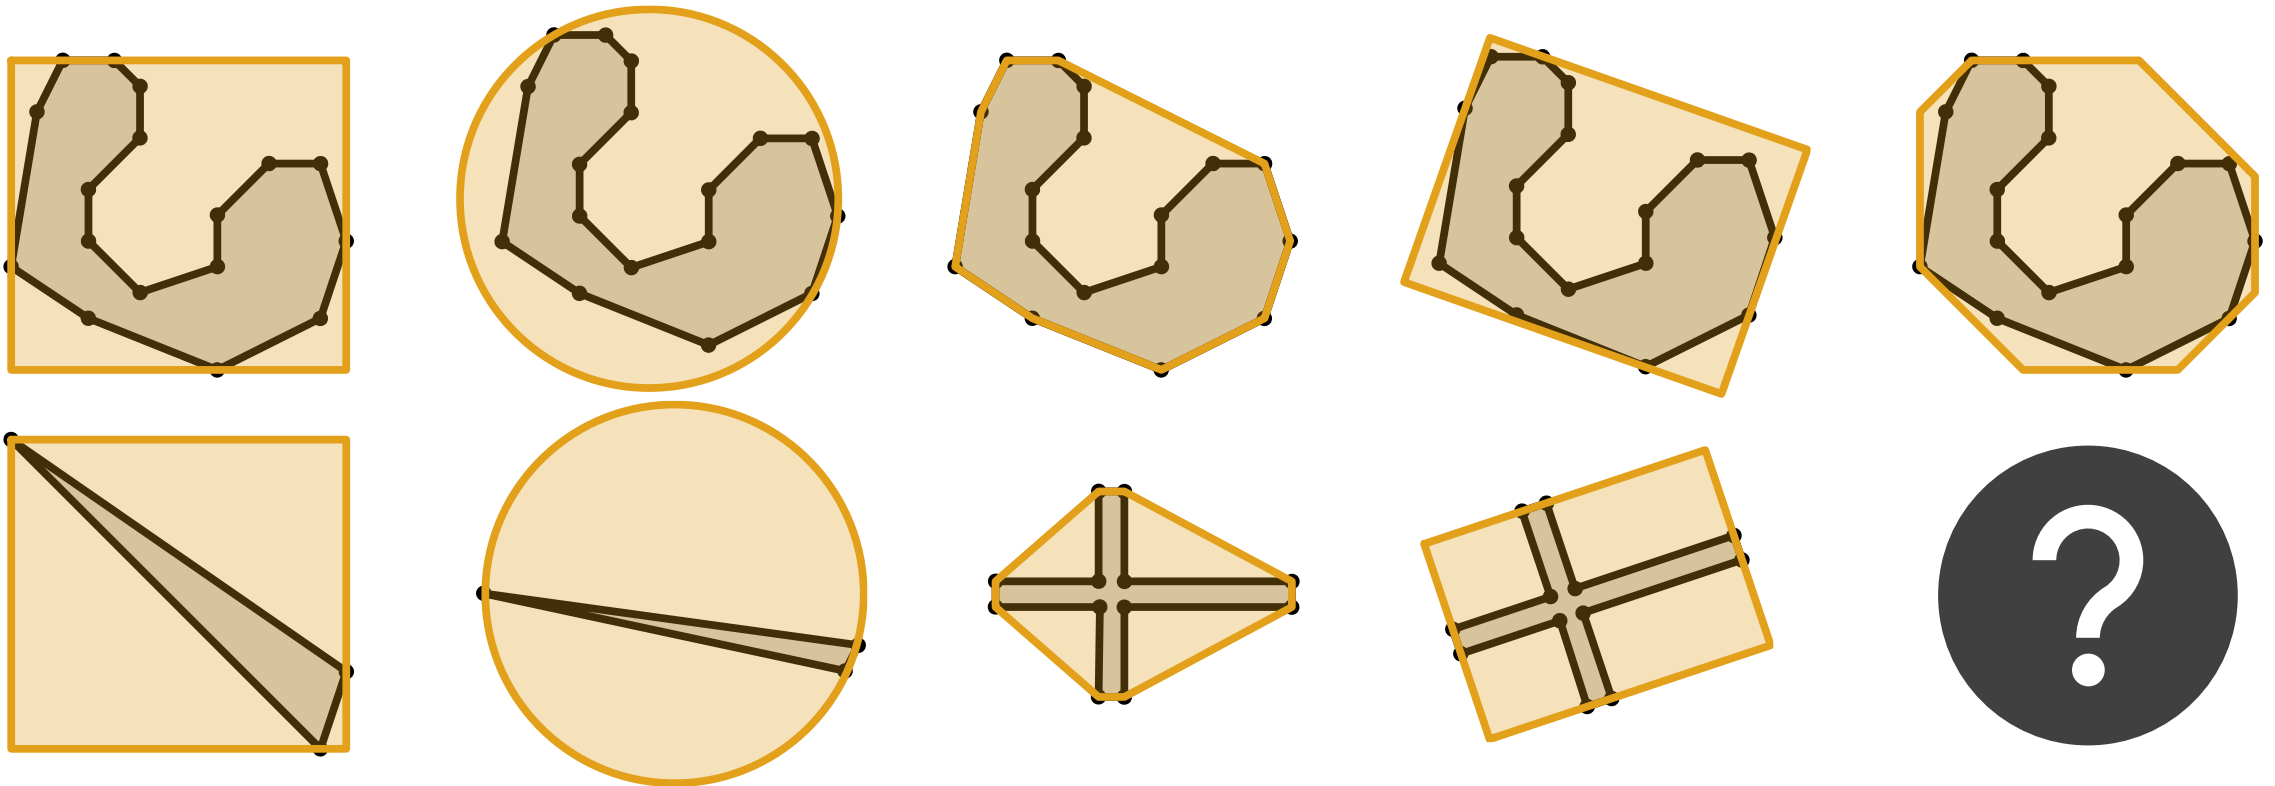

Can you think of types of bounding volumes that we've already encountered?

Bounding volumes

Bounding volumes

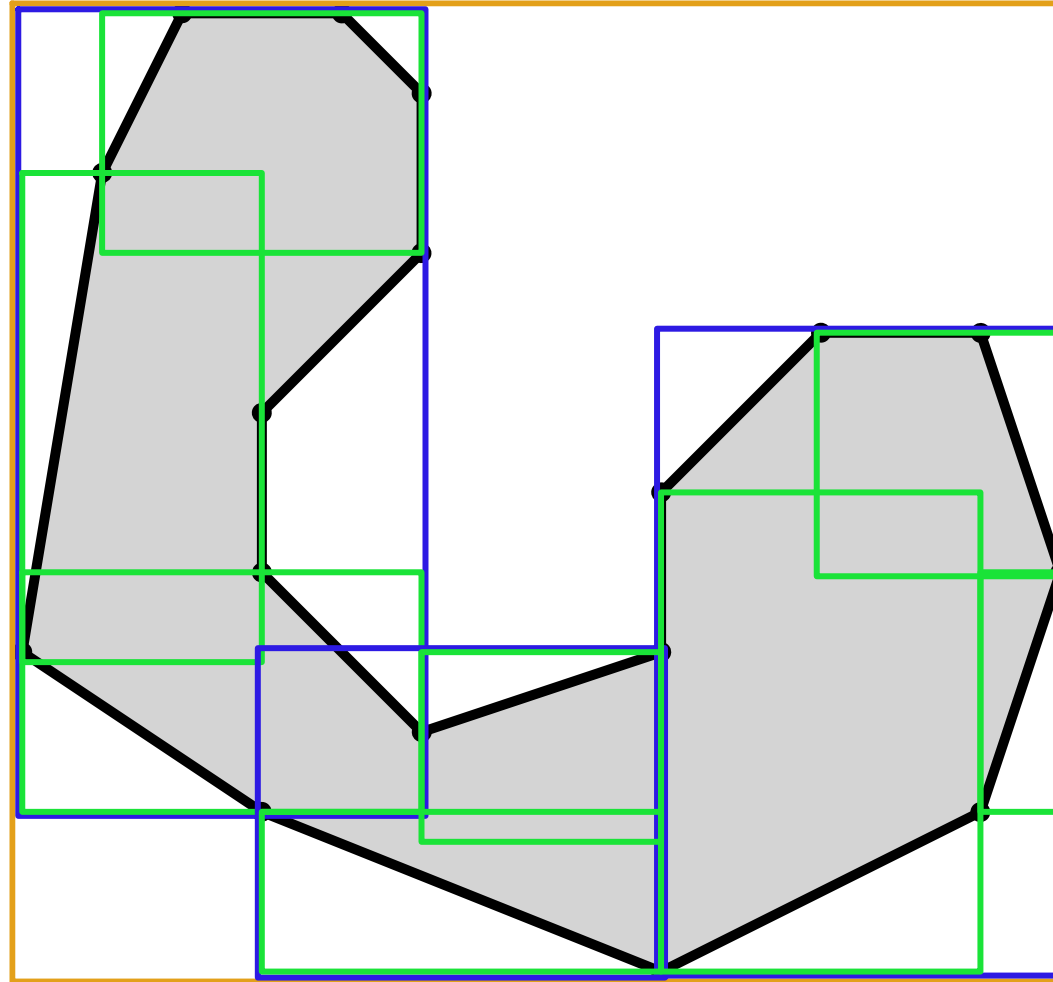

Some types of bounding volumes that we've already encountered!

k -DOPs

Bounding volume hierarchies – Primitives

**What do we
have to do to
ensure that this
works?**

Bounding volume hierarchies– k -DOP

General idea – Bounding volume hierarchies

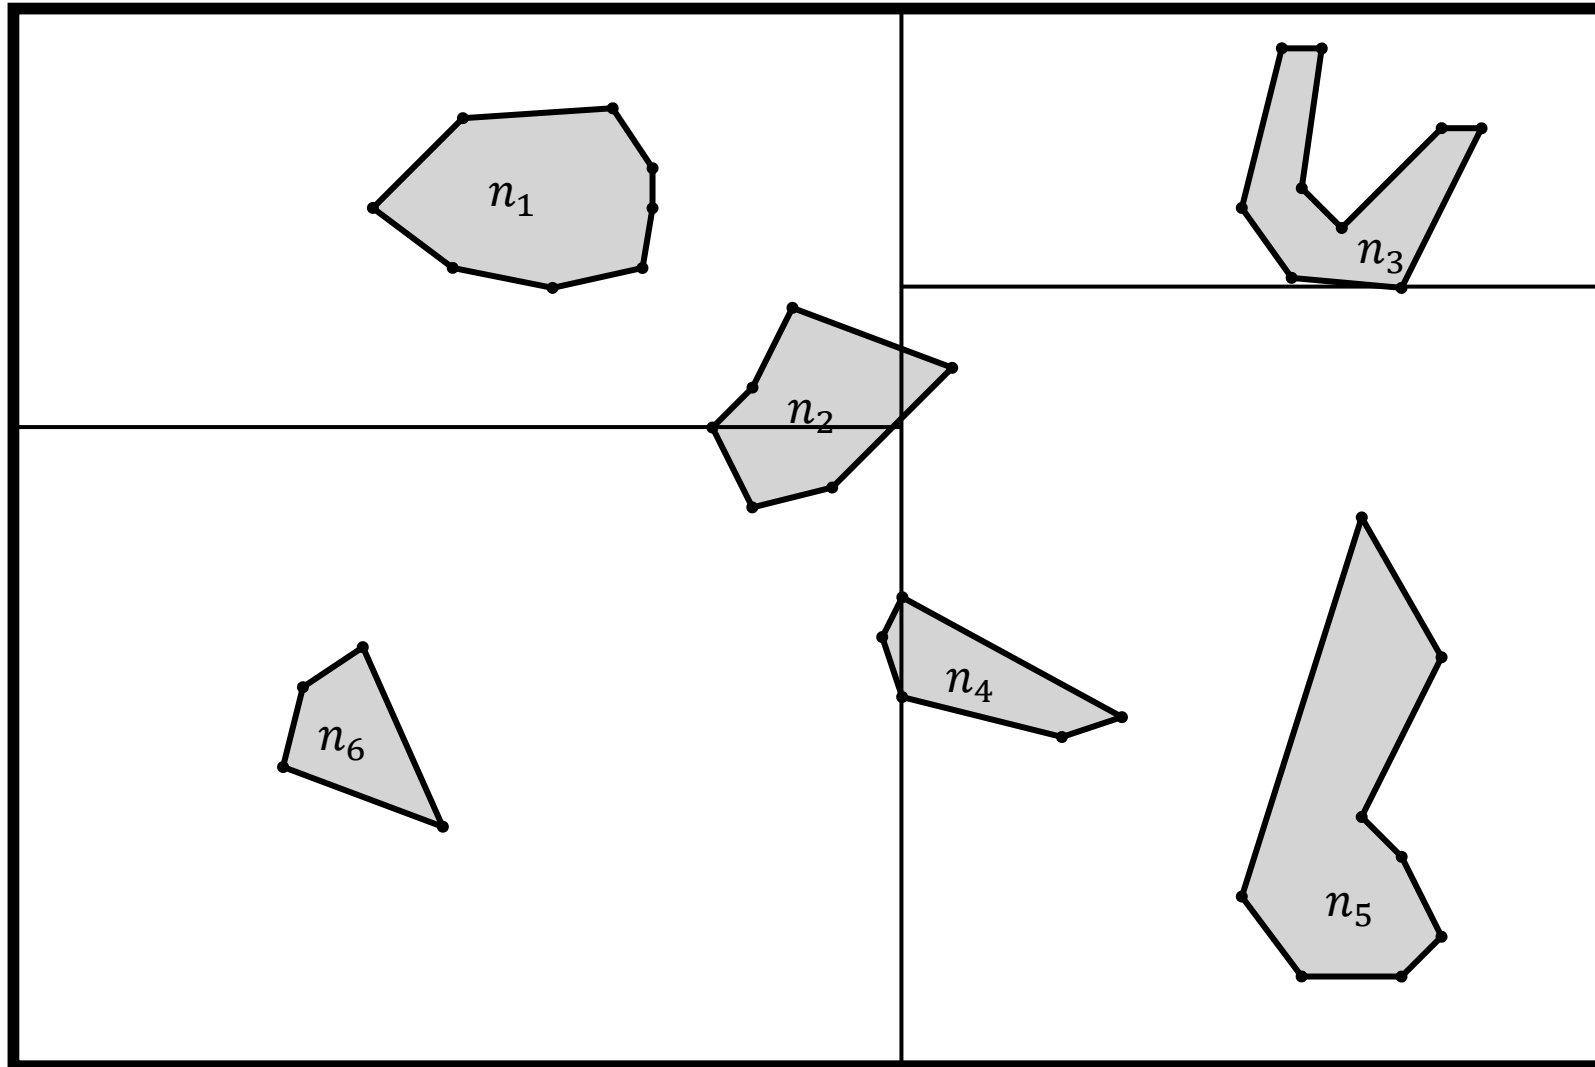

Bounding volume hierarchies – k - d -tree

Bounding volume Hierarchies – k - d -tree

Bounding volume hierarchies – k - d -tree

Bounding volume hierarchies – k - d -tree

k-d-tree

k-d-tree

Bounding volume hierarchies – k - d -tree

Bounding volume hierarchies – k - d -tree

Bounding volume hierarchies – k - d -tree

Bounding volume hierarchies – k - d -tree

More applications in computer graphics

<https://ncase.me/sight-and-light/>

k-d-tree – Range search

Find an apartment with

- 400 – 650€ / month
- 70 – 100 m^2

k-d-tree – Range search

Find an apartment with

- 400 – 650€ / month
- 70 – 100 m^2

k-d-tree – Range search

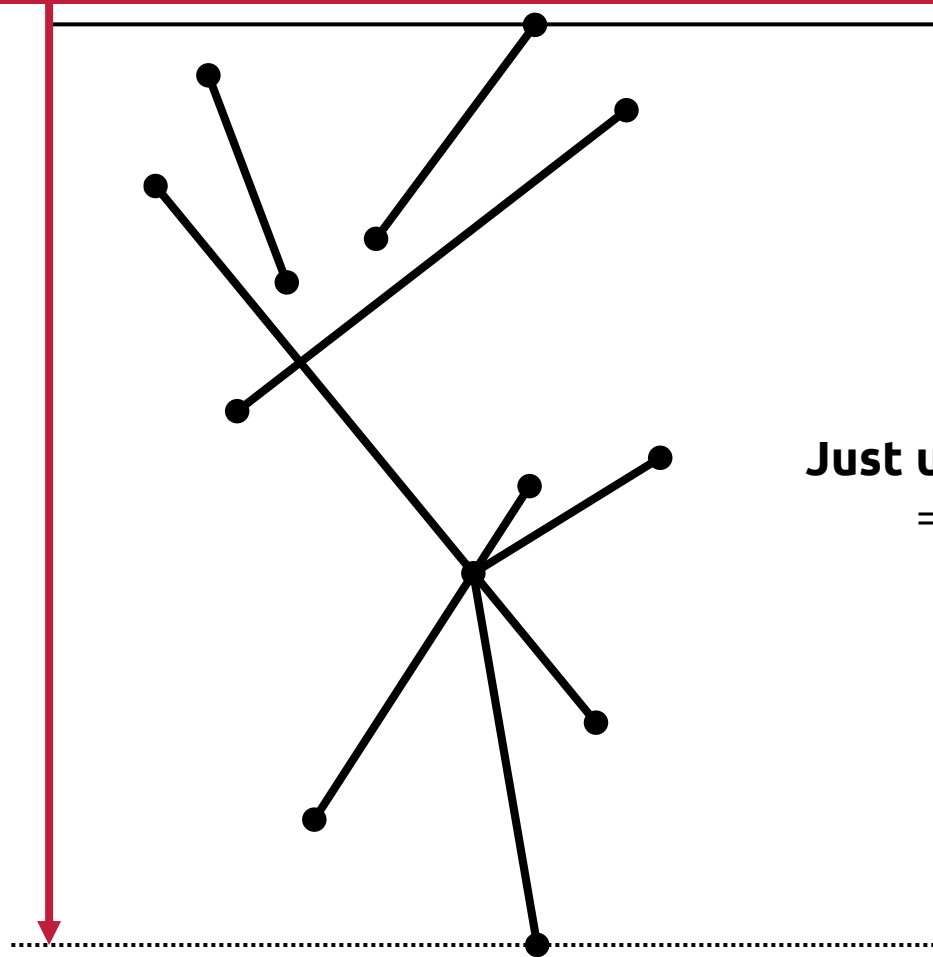

Find an apartment with

- 400 – 650€ / month
- 70 – 100m²

Line segment intersection – Ideas?

Multiple polygon intersection – Ideas?

Just use a sweep line!
 $\Rightarrow O(n \log(n))$
